

## **National Competency Profiles for Real Estate**

The RERC-ARCIC project to develop national competency profiles for Salesperson and Broker continues to make good progress.

A first round of bilateral telephone discussions has been completed between the CamProf consultants and the Working Group representatives nominated by six provinces. A summary comparison of the findings has been considered by the project Steering Committee.

The Steering Committee has also discussed and approved a Concept Specification setting out the structure and format of the new competency profiles.

The next stage of detailed competency development is now getting underway. The CamProf team will continue to work virtually with the Working Group over June and July, progressively building up draft profiles for validation later in the year.

Despite the difficulties caused by Covid -19, the project remains on track to launch the new profiles in early 2021.
